What can I do?

The robot is displayed incorrectly on the map. What can I do?

Sara - 2023-08-25 - App-Function

In rare cases, it can happen that the robot navigates incorrectly in a map or does not navigate correctly at first. It usually takes only a few minutes until the robot autonomously finds its position again and is also displayed correctly on the map.

NOTE: If several maps have been created for different floors, and the robot uses the wrong map, it is best to correct this by restarting the robot.
