romy

I want to use the robot in a room or on a floor that has not yet been mapped. Is that possible?

Sara - 2023-08-25 - App-Function

Yes, you can use the robot in areas that were not previously explored. Place the robot in the designated area and press the PLAY/PAUSE button. The robot will briefly explore this area and clean it. After cleaning, the robot will return to its starting point.

You don't need to move the docking station to this location. Just make sure the robot is charged.
